

Norris Electric

Your Touchstone Energy® Partner 

News

Unclaimed Capital Credit Checks, 1979-1981

In May 2019, Norris Electric returned \$1,999,034.13 in capital credit allocations to members who purchased electricity from 1979 through 1981. Norris mailed checks to the last known addresses on file for these members. As of August 1, 2019, the list below contains the names of members whose checks were returned to us by

the post office because of incorrect addresses.

We need your help... if your name is listed below, or if you have an updated address for someone on the list, please contact Norris Electric. If one of your relatives is on the list and he or she is deceased, we are able to rewrite the check in the name(s) of the member's

heir(s). Please contact our office to obtain the forms needed to claim these funds by calling 1-877-783-8765 or emailing: capitalcredits@norriselectric.com. This list of names along with last known addresses is also available on our website at www.norriselectric.com.

Energy Efficiency Tip of the Month

Cookware Tip: Copper-bottomed pans heat faster on the stove. In the oven, ceramic and glass dishes are better than metal. With ceramic and glass dishes, you can turn the oven down about 25 degrees, and your meal will cook just as quickly.

Source: energy.gov

HAPPY LABOR DAY

Our office will be closed Monday, September 2nd, for Labor Day.

Farmers: Remember electrical safety this harvest season

In 2017, farmers ranked eighth in the list of the most dangerous jobs (civilian jobs with highest fatality rates) according to the Bureau of Labor Statistics/U.S. Dept. of Labor. Unfortunately, farmers, ranchers, and other agricultural managers rank right below other hazardous jobs such as logging, roofing, and steel work.

It is no wonder farmers make that list. As agriculturists are well-aware, many dangers are present in their long and arduous workdays.

Safe Electricity and **Norris Electric Cooperative** remind farmers that accidents related to power and electricity are also possible but in most cases, they can be prevented. Especially during the busy harvest season, take the following steps to decrease the chances of an electrical-related incident:

- Always use a spotter when operating large machinery near lines.
- Use care when raising augers or the bed of grain trucks around power lines.
- Keep equipment at least 10 feet from lines — at all times, in all directions.
- Inspect the height of the farm equipment to determine clearance.
- Always lower extensions to the lowest setting when moving loads.
- Never attempt to move a power line out of the way or raise it for clearance.
- If a power line is sagging or low, call us right away.
- If your equipment does hit a power line, do not leave the cab. Immediately call 9-1-1, warn others to stay away, and wait for the utility crew to cut the power.

Although harvest season is a time filled with tight deadlines and heightened work stress, take the time to consider electrical safety. It could save your life or the lives of others.

For more information about electrical safety, visit SafeElectricity.org.

HARVEST SAFETY TIPS FOR FARMWORKERS

Maintain a 10-foot clearance around all utility equipment in all directions.

Use a spotter and deployed flags to maintain safe distances from power lines and other equipment when doing field work.

If your equipment makes contact with an energized or downed power line, contact us immediately by phone and remain inside the vehicle until the power line is de-energized. In case of smoke or fire, exit the cab by making a solid jump out of the cab, without touching it at the same time, and hop away to safety.

Consider equipment and cargo extensions of your vehicle. Lumber, hay, tree limbs, irrigation pipe and even bulk materials can conduct electricity, so keep them out of contact with electrical equipment.
